14' long x 24" wide

CANDLE NOTES

*****Please leave all our candle holders clean and wax free when you are finished with them.*****

OUR LED CANDLES - Our LED candles will have batteries in them when you arrive and you are welcome to use the existing batteries. We do not change batteries between events. If you'd like fresh new batteries in our LED candles, you are welcome to bring your own batteries and install them in our LED candles.

REAL FLAMES: You are welcome to light real candles at The View, as long as the flame stays below the top of our rigid container. We do not supply any real candles. You are responsible for leaving candle holders clean and wax free, in order to avoid a cleaning fee.

TAPER CANDLES STICKS: You are not allowed to light real flames when using any of our taper candlestick holders.

CYLINDERS: If you'd like to use floating candles, we recommend 3-inch floating candles. Floating candles work well and they don't leave a wax mess. We discourage the use of pillar candles with real flames. Pillar candles tend to leave the cylinders quite messy. If you'd like use them, we ask that you leave the cylinders clean after your event. Or we are happy to clean them for you, for a \$100 cleaning fee.

VOTIVE CANDLE HOLDERS *****Disposable***** battery-operated votive candles work well in our votive candle holders. (Check the size to ensure they will fit) . But if you want to use real candles with real flames, we ask that your wax candles are contained in a plastic cup, so the wax doesn't melt directly onto the votive glass, in order to avoid having to clean the wax out of the votive or incurring a cleaning fee.
